

## Year 6 Willaston Weekly Distance Learning Week 4

### Reading

GOLDFISH BOY! I've added the pages of chapter 7 to this week's learning pack - if you have a kindle you may wish to download it or order the book for yourselves. I've recorded myself reading chapter 7 - there are some discussion questions and a follow up task to complete.

**Don't forget to do your own reading or audio listening - Amazon audible is free for children whilst schools are closed!**

**Further reading** - the First News is available on line from our school website - have a go at one of the quizzes!

**Writing focus** - thank you so much for your autobiographies - they were so great to read. If you haven't sent yours to me or started yours maybe have a go this week. The new writing focus for this week is a persuasive piece. At this time of year schools give information to new reception parents about their school. I would like you to write a piece that would persuade parents to enrol their reception child at Willaston School - you can present this however you wish but you must include a letter with your information about the school. You could include photos/pictures, a video - it is up to you. I've included a PDF to remind you about persuasive writing success criteria. If we get some successful ones we can include them on our school website!

**Look at google classroom for 'word' of the day posts and activities!**

**Maths focus** - Remember that we said we would use this time to go over and review our calculation skills using bar models? This week I have put together some multiplication and division ideas using bar modelling and some marking of your own to do!! Please see the maths powerpoint for week 4. There are some activities to either print off or do on paper. I've also included some practice activities on rounding numbers for you to have a go at and refresh your memories!

Make sure that you are completing a fluent in five or a timetable quiz daily - I have added some new ones.

This link will take you to a website I use a lot called I see maths. Gareth Metcalfe has daily lessons on there to get you thinking! Have a go at a few this week - let me know how you get on <http://www.iseemaths.com/>

**Topic ideas** - RE - Last Friday the religious festival Ramadan began - what information can you find out about the muslim festival? This link will take you to BBC bitesize information about Ramadan - <https://www.bbc.co.uk/bitesize/topics/zpdtbkb/articles/zjc2bdm>

**Art** - Can you take photos of blossom on your daily walks this week? Think about taking photographs for people to see - how might you frame the shot? Here is a link to the importance of the Cherry blossom season in Japan - you may wish to do some sketches or paintings of cherry blossom to accompany your photographs - <https://www.bbc.co.uk/news/business-51829851>

**Science** - have a go at the attached science investigation and write or video a report about what happened.

**PE** - Remember the activity bingo from last week? Well this week I would like you to create your own activity bingo! Test it out yourself then pass it onto the qoogle classroom for others in the class to try out!

### Ongoing ideas to support your year 6 child -

**KEEP CHECKING YEAR 6 GOOGLE CLASSROOM - KEEP IN TOUCH!**

**Science** - I've attached a couple of fun kitchen science activities to have a go at. Remember to follow the instructions carefully and create a mini science report about how the investigation went - you could create a video to share if you wish!

**First News** - happy news! Can you find examples of happy news either from First News online or local newspapers? Share these with the rest of the class.  
<https://live.firstnews.co.uk/positivity-place/happy-news/>

**TT Rock Stars** - your parents will get an email about this - it is an online account to practise timetables - its great fun too!

**Spellings** - this week we will look at words that can be nouns and verbs! There is an activity attached!

Have a chat about this week's sticky question!
