

Year 6 Willaston Weekly Distance Learning Week 7

Reading

GOLDFISH BOY! Apologies for the technical issues with Goldfish Boy last week! I've recorded chapter 9 in two parts as it is large (so I'm not going to take pictures of it) There are some follow up activities - I will post the second half of the chapter mid week. **See Google Classroom for video! Further reading** - the First News is available on line from our school website - have a go at one of the quizzes! I'd also love to hear about any other types of reading you are doing - if anyone could recommend a book to the class please do!

Writing focus - this week we are going to continue with our unit of work, 'Doors'. I absolutely loved your poems - look out on our school website for some examples of your work! Please follow the attached activities - there will be some poetry work, reading, art and story writing included in this unit over the weeks to come. This week there are three activities to complete - please have a go at all of them, as they will really support your writing. One of the activities is to perform a poem! Unfortunately, recording my voice on the power points makes them too large to send to you - which is a shame -if you need any support with this unit please just ask. I'm looking forward to some recordings of you performing some poetry!

Spelling Focus - this week our focus will be words that have the ending 'ible'. Have a go at the activity attached. **For any further English learning - Pobble is great for writing and BBC Bitesize has some helpful activities for grammar.**

Maths focus- this week we will continue our unit of work on decimal numbers - we will focus on subtracting decimals. There is a powerpoint on subtracting decimal numbers to work - try each slide - no peaking a the answers before a slide! I've also attached a code cracker activity linked to decimal numbers - have a go and I'll post the answers on google classroom. I've attached a link to a useful video on subtracting decimal numbers and some further questions for you to practice this concept. **REMEMBER** if you are struggling with this in anyway - please ask!
<https://corbettmaths.com/2013/03/28/subtracting-decimals/> **useful on line video!**
Make sure that you are completing a fluent in five or a timetable quiz daily. There are also some rapid reasoning daily quizzes to have a go at too.

Topic -

Geography - last week we started our topic about mountains/hills. Thank you for the photos of you and your families climbing Snaefell! Maybe you could walk in a different hilly area on the Isle of Man this week and compare the terrain/views to Snaefell? This week we will start to look at mountains beyond the Isle of Man - there are some activities attached linking to map work and locating mountains in Europe and around the world. If you would like to do research on a particular mountain range or make sketches/presentations about mountains which interest you, please do so.

STEM - This is a Science thinking activity that I thought you may like to try - you will chocolate bars!! Follow the instructions on the activity sheet on our website.

On your walks this week - try to take photographs of things that are blue - you could create a collage of the photos - how many shades of blue can you find?

Ongoing ideas to support your year 6 child -

WELL DONE TO EVERYONE WHO IS HAVING A GO AT TT Rock Stars -I CAN SEE WHO HAS BEEN PRACTISING!!

WORD of the day is back this week so please do look out for the daily challenges on our **Google Classroom**.

Transition - don't forget to keep looking at **SNHS google classroom for year 6** - Miss Parr has set some challenges for you all.

PE - **Active Souls** have added further activities for you to try in your garden, house or street
